

Asbestos

Over the last seventy years or more, asbestos in its many forms has been used extensively in industry and the building trade. It was used in insulating boards, ceiling tiles, thermal insulation, rope, blanket, joints/gaskets/packings, brake and clutch linings and cement sheets and pipes.

Green Contract Services provide:

- All Surveys are carried out in accordance with MDHS100
- Asbestos surveys carried out by surveyors trained to a recognised industry standard (B.I.O.H) which enables them to undertake Type 1, 2 and 3 surveys.
- Specialist asbestos service to advise and alleviate your asbestos problem including operatives and supervisors to undertake any size of removal or encapsulation works.
- A method statement and risk assessment is provided to the client prior to commencement of any asbestos work.
- A fully trained team of asbestos removers are employed by Green Contract Services with the most up to date HSE approved equipment and training.
- In all cases air monitoring is carried out by an independent analytical laboratory to ensure that the highest standards have been attained.
- All waste is disposed of to a licensed landfill site in accordance with the hazardous waste regulation 2005.
